WORK EXPERIENCE

PROJECT MANAGER

HighJump Software | Dec 2018 - Sept 2019

- Successfully managed implementation projects with multiple development resources, meeting deadlines and service level agreements.
- Performed code reviews with junior resources to ensure solution integrity.
- Provided project status reports to project team.
- Displayed HighJump's core values to customers and team members.

IMPLEMENTATION CONSULTANT

HighJump Software | Nov 2017 - Present

- Built and trained a neural network to predict order priority with ever-increasing accuracy.
- Created an AES-256 CBC encryption module to wrap login procedures for proprietary software.
- Customized voice-recognition software and procedures to increase warehouse accuracy and efficiency for clients.
- Consulted with businesses to identify and implement changes to increase process optimization.

SYSTEM ADMINISTRATOR

Reference Media, Inc. | Jul 2016 - 2017

- Implemented a full-stack web framework and aided with content creation.
 - Decrypted 120,000 files locked by a variant of the Crysis ransomware virus.
 - Wrote and implemented a formal security policy for a growing business.
-
